PRO MODEL'S

INLAND SURFER'S "FLYBOY DIVISION" JAMES WALKER PRO MODEL

Inland Surfer's FlyBoy division, ultra light composite construction. James Walker Signature Pro Model.

Epoxy Infused Technology - our top secret way of fully soaking the fiber glass with epoxy to create the strongest bond.

Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.

Fin Options - number of fin options available.

Progressive Edge - The rail geometry and construction that holds the board close to the wake without creating unwanted drag.

3 STAGE Rocker - This is a 3 stage rocker profile designed for competition level performance. Ideal for quick snappy turns and HUGE airs.

Carbon Rail - A layer of Carbon Fiber along the entire rail of the board for added strength and durability.

Ability Level: The ability level recommendation for this board is Intermediate to Pro.

Tech Specs: 4'6" x 20.5" x 1.25" 5 lbs.

Weight Range: The weight range recommendation for this board is 100lbs. to 200+lbs. depending on wake size.

Note: Twinzer fins included.

ABOUT

The James "Flyboy" Walker signature is like no other board in the lineup. We used our new composite sandwich construction with healthy doses of carbon fiber and composite materials to achieve an ultra responsive, ultra light performer. This competition board is a must have for serious riders whether you want to stand on the podium or just want to crush it behind your boat on your home lake.

4 - SKIM KEENAN FLEGEL PRO MODEL

2010 WakeSurfing World Champion Keenan FLEGEL Signature Pro Model. Ultra light composite construction.

Epoxy Infused Technology - our top secret way of fully soaking the fiber glass with epoxy to create the strongest bond.

Progressive Edge - The rail geometry and construction that holds the board close to the wake without creating unwanted drag.

Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.

Fin Options - number of fin options available.

ROCKET Rocker - This profile has been designed to provide the absolute maximum down-the-line speed without sacrificing edge to edge performance.

Carbon Rail - A layer of Carbon Fiber along the entire rail of the board for added strength and durability.

T2X - Two T Stingers to strengthen the core of our wakesurfer and balance flex with rigidity.

Ability Level: The ability level recommendation for this board is Intermediate to Pro.

Tech Specs: 4' 2.75" - 20.5" - 5/8" 3 lbs.

Weight Range: The weight range recommendation for this board is 70lbs. to 190+lbs. depending on wake size.

Note: All skim style boards come with 1 single 4-Skim fin only.

ABOUT

Designed by Keenan Flegel, the World Wakesurfing Champion, the new Keenan Signature Pro Model 4-Skim redefines skim-style boards. Although sharing a similar profile with the 4Skim Ooze, this board features a full composite construction to make it even lighter and carbon fiber rails for added strength and more pop. The Keenan 4Skim has stepped up its game just like the Champion it's named after.

OUR BEST ALL AROUND SURF STYLE

Ability Level: The ability level recommendation for this board is Beginner to Advanced.

Tech Specs:
5'6" x 22" x 1.75" 9 lbs.

Weight Range: The weight range recommendation for this board is 100lbs. to 300+lbs. depending on wake size.

Note: All surf style boards come with 1 pair of standard 9cm surf fins only.

RED ROCKET QUAD FIN

WoodLoc - our process that inserts laminated layers of wood into the board top and bottom platform, to increase strength, rigidity, stiffness and overall performance.

Vortex Channel - speeds up water and injects air near the tip of the board producing a faster board and avoids pearling (nose diving).

Progressive Edge - The rail geometry and construction that holds the board close to the wake without creating unwanted drag.

Epoxy Infused Technology - our top secret way of fully soaking the fiber glass with epoxy to create the strongest bond.

Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.

Fin Options - number of fin options available.

ROCKET Rocker - This profile has been designed to provide the absolute maximum down-the-line speed without sacrificing edge to edge performance.

Drop "V" tail - Concave tail feature provides maximum release of water tension from under the board.

ABOUT

Just because you are a "big guy" it doesn't mean you shouldn't have to ride a sluggish board. Built from the Red Woody platform, the Red Rocket includes key design upgrades for improved performance. We added a second pair of fin boxes to make it an A-Frame quad fin option and threw in the new Drop V tail just to make sure our big guy board can still rip the lip off the wake. This is the most technologically advanced large board on the market. Period.

Ability Level: The ability level recommendation for this board is Beginner to Advanced.

Tech Specs:
5'3"-1.75"-21" 8 lbs.

Weight Range: The weight range recommendation for this board is 100lbs. to 250+lbs. depending on wake size.

Note: All surf style boards come with 1 pair of standard 9cm surf fins only.

BLUE LAKE V2 QUAD FIN

WoodLoc - our process that inserts laminated layers of wood into the board top and bottom platform, to increase strength, rigidity, stiffness and overall performance.

Vortex Channel - speeds up water and injects air near the tip of the board producing a faster board and avoids pearling (nose diving).

Progressive Edge - The rail geometry and construction that holds the board close to the wake without creating unwanted drag.

Epoxy Infused Technology - our top secret way of fully soaking the fiber glass with epoxy to create the strongest bond.

Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.

Fin Options - number of fin options available.

ROCKET Rocker - This profile has been designed to provide the absolute maximum down-the-line speed without sacrificing edge to edge performance.

Drop "V" tail - Concave tail feature provides maximum release of water tension from under the board.

ABOUT

No other board delivers this level of performance for such a wide of range of weight and ability levels. We took the classic Blue Lake and added the new Drop V Tail for improved acceleration, tracking and tail release. The other guys may try to knock us off but there's no other board made like or rides like the Inland Surfer's Blue Lake!

PERFORMANCE SURF STYLE

Ability Level: The ability level recommendation for this board is Intermediate to Pro.

Tech Specs: 5'3"x 20.5"x 1.75" 8 lbs.

Weight Range: The weight range recommendation for this board is 100lbs. to 250+lbs. depending on wake size.

Note: All surf style boards come with 1 pair of standard 9cm surf fins only.

SWALLOW V2 QUAD FIN

WoodLoc - our process that inserts laminated layers of wood into the board top and bottom platform, to increase strength, rigidity, stiffness and overall performance.

Vortex Channel - speeds up water and injects air near the tip of the board producing a faster board and avoids pearling (nose diving).

Progressive Edge - The rail geometry and construction that holds the board close to the wake without creating unwanted drag.

Epoxy Infused Technology - our top secret way of fully soaking the fiber glass with epoxy to create the strongest bond.

Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.

Fin Options - number of fin options available.

ROCKET Rocker - This profile has been designed to provide the absolute maximum down-the-line speed without sacrificing edge to edge performance.

STEPtech creates a release point at the tail of the board for the water as it flows through. This means more down the line speed and better release off the wake for bigger airs.

Drop "V" tail - Concave tail feature provides maximum release of water tension from under the board.

ABOUT

We took the swallow and added our new Drop V Tail and STEPtech for even more speed. The Swallow is faster and more responsive than ever. If your looking to take your surf style riding to a new level or a step up from the Blue Lake this board is for you.

Ability Level: The ability level recommendation for this board is Intermediate to Pro.

Tech Specs: 4'8"x 21"x 1.5" 7 lbs.

Weight Range: The weight range recommendation for this board is 150lbs. to 225+lbs. depending on wake size.

Note: All surf style boards come with 1 pair of standard 9cm surf fins only.

SWEET SPOT PRO QUAD FIN

WoodLoc - our process that inserts laminated layers of wood into the board top and bottom platform, to increase strength, rigidity, stiffness and overall performance.

Vortex Channel - speeds up water and injects air near the tip of the board producing a faster board and avoids pearling (nose diving).

Progressive Edge - The rail geometry and construction that holds the board close to the wake without creating unwanted drag.

Epoxy Infused Technology - our top secret way of fully soaking the fiber glass with epoxy to create the strongest bond.

Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.

Fin Options - number of fin options available.

ROCKET Rocker - This profile has been designed to provide the absolute maximum down-the-line speed without sacrificing edge to edge performance.

STEPtech creates a release point at the tail of the board for the water as it flows through. This means more down the line speed and better release off the wake for bigger airs.

ABOUT

We took the ultra-high performance of the Sweet Spot and cranked it up a notch. With the added STEPtech to create speed as well as release off the lip, the board received a new more aggressive outline and 8mm of nose rocker to increase the attack angle as you edge up the wake and we decreased the width by 1". With these changes our Sweet Spot Pro will take your riding beyond expectations.

PRICE POINT PERFORMANCE SURF STYLE

MUCUS DUAL FIN

-  WoodLoc - our process that inserts a laminated layer of wood into the top platform, to increase strength, rigidity, stiffness and overall performance.
-  Vortex Channel - speeds up water and injects air near the tip of the board producing a faster board and avoids pearling (nose diving).
-  Progressive Edge - The tail geometry and construction that holds the board close to the wake without creating unwanted drag.
-  Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.
-  ROCKET Rocker - This profile has been designed to provide the absolute maximum down-the-line speed without sacrificing edge to edge performance.
-  Fin Options - number of fin options available, 2 degree tow in.

ABOUT

Surf style plus high value equals the Mucus. The fiberglass Mucus will blow you away with it's down the line speed and edge to edge quickness. We implemented a two degree "toe-in" angle on the fin boxes for unbelievable maneuverability while allowing the board to spin and break free on command. Big guys (200 +) can ride this board as well as the beginners. The most bang for your buck on the Market.

Ability Level: The ability level recommendation for this board is Beginner to Intermediate.

Tech Specs:
4'11"- 20.75"- 1.5" 8 lbs

Weight Range: The weight range recommendation for this board is 100lbs. to 250+lbs. depending on wake size.

Note: All surf style boards come with 1 pair of standard 9cm surf fins only.

PERFORMANCE SKIMS STYLE

4-SKIM "BLACK PEARL" TRI FIN

-  WoodLoc - our process that inserts laminated layers of wood into the board top and bottom platform, to increase strength, rigidity, stiffness and overall performance.
-  Epoxy Infused Technology - our top secret way of fully soaking the fiber glass with epoxy to create the strongest bond.
-  Progressive Edge - The rail geometry and construction that holds the board close to the wake without creating unwanted drag.
-  Rear Kick - EVA traction with raised rear kick pad for incredible foot hold.
-  Fin Options - number of fin options available.
-  ROCKET Rocker - This profile has been designed to provide the absolute maximum down-the-line speed without sacrificing edge to edge performance.

ABOUT
